1. Introduction

- 1.1 This document is the 2017 Housing Land Position Report for South Lakeland district outside the National Parks, to a base date of 31 March 2017. It provides an assessment of housing land supply and the 5-year housing land position against the latest the latest evidence of objectively assessed housing need in the Council's [Strategic Housing Market Assessment](#), or SHMA, (October 2017). This represents the Council's up-to-date position statement on 5-year housing land supply. The 5-year supply position against the adopted Core Strategy housing target (based on less up-to-date projections) is also included for purposes of comparison only. Historic information relating to the Core Strategy targets are shown in *grey italics*.
- 1.2 The Government is currently consulting until 9 November 2017 on a new standard national methodology for assessing the requirement for housing. See <http://tinyurl.com/ycd3u46b> The Council will review the need to update the current assessment of 5-year land supply when the national guidance is confirmed – currently expected by April 2018.
- 1.3 This annual report provides a range of information used to monitor housing land supply including planning permission data, development progress on sites and information on the deliverability of sites in relation to the 5-year housing land supply requirement. It takes account of constraints as well as landowners' and developers' intentions, where known. In particular it takes close account of information from developers and land owners in response to a survey in early 2017 regarding likely rates of development on permitted and allocated housing sites. We intend to repeat this survey annually. The assessment of housing land supply continues to include information within the extensions (August 2016) to the National Parks, as the District Council's planning policies continue to apply in these areas until replaced by updated National Park Local Plans. This report will be updated in autumn 2018 to cover the period from April 2017 to March 2018.
- 1.4 This document is divided into five parts:

Part 1 is this **introduction**;

Part 2 explains the **national and local policy context** within which the Council plans for new housing;

Part 3 explains how the Council is performing in terms of **meeting overall housing need** in the longer term;

Part 4 explains how the Council is delivering a **5-year supply of land for new housing** to meet immediate needs;

Part 5 sets out the **conclusions**.

There is more detailed information in the appendices including a table indicating where the Council expects new housing can be delivered over the next five years.

- 1.5 The Annual Monitoring Reports contain further information on a range of wider housing issues and can be downloaded from the Council's website at <http://tinyurl.com/yd5fhh6u>
- 1.6 The information in this report is based on data from the Council's *Fast Planning* and *Fast Control* databases and in some cases from independent inspectors.

2. Policy Context

National Planning Policy Framework (NPPF)

2.1 The National Planning Policy Framework (NPPF) published on 27 March 2012 states in relation to housing supply:

“47. To boost significantly the supply of housing, local planning authorities should:

- use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework, including identifying key sites which are critical to the delivery of the housing strategy over the plan period;*
- identify and update annually a supply of specific deliverable⁽¹¹⁾ sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, local planning authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land*
- identify a supply of specific, developable⁽¹²⁾ sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15;*
- for market and affordable housing, illustrate the expected rate of housing delivery through a housing trajectory for the plan period and set out a housing implementation strategy for the full range of housing describing how they will maintain delivery of a five-year supply of housing land to meet their housing target; and*
- set out their own approach to housing density to reflect local circumstances.*

48. Local planning authorities may make an allowance for windfall sites in the five-year supply if they have compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply. Any allowance should be realistic having regard to the Strategic Housing Land Availability Assessment, historic windfall delivery rates and expected future trends, and should not include residential gardens”

Footnotes

¹¹ *To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.*

¹² *To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged”.*

South Lakeland Local Plan

- 2.2 South Lakeland's Local Plan covers the period from 2003 to 2025 and contains four main documents - called Development Plan Documents (DPDs):
- **Local Plan Part 1 – South Lakeland Core Strategy** (adopted in 2010) which sets out the quantity, distribution and general principles underlying development;
 - **Local Plan Part 2 – Land Allocations** (adopted in 2013) which allocates sites to meet development needs;
 - **Local Plan Part 3 – Development Management** (currently in preparation) which sets out the criteria that new development has to meet and will replace a number of 'saved' Local Plan policies in the 1997 Local Plan;
 - **Local Plan Part 4 – Arnside and Silverdale AONB DPD** (currently in preparation) which is a plan being prepared jointly with Lancaster City Council dealing with the special issues associated with the Arnside Silverdale Area of Outstanding Natural Beauty.
- 2.3 The Council's Local Development Scheme sets out the Council's intention to commence work on a new single Local Plan for the period 2016 to 2036, which is scheduled for adoption in 2021. Following consultation with stakeholders, an updated Strategic Housing Market Assessment (SHMA, October 2017) has been published which sets out a revised assessment of objectively assessed housing need. As this is based on the most up-to-date assessment of demographic and other evidence, the resulting full objectively assessed need (FOAN) figure of **290 dwellings** per annum (2016-2036) in the published SHMA forms the basis for the calculation of the 5-year housing land position in this report. *However, the 5-year supply position against the adopted Core Strategy housing target is also included in this report for purposes of comparison only.*

3. Overall Housing Land Position

- 3.1 This section sets out the overall housing land supply position as at 31 March 2017 in relation to:
- The latest assessment of objectively assessed housing need in the updated Strategic Housing Market Assessment (SHMA, October 2017) for the period 2016 to 2036.
 - The adopted Core Strategy target of 400 dwellings per year for the plan period of 2003 to 2025.*
- 3.2 Table 3.1 sets out the overall housing land position for the District for the period of the forthcoming single Local Plan, 2016-2036. This is based on an objectively assessed housing need figure of 290 dwellings per annum in the SHMA, October 2017. The table shows an over-supply of land for 1,442 dwellings to meet a residual requirement of 5,555 dwellings to 2036, when account is taken of existing permissions, sites allocated in the adopted Land Allocations DPD, an allowance for sites in the Strategic Housing Land Availability Assessment (SHLAA) and windfall sites. While this suggests there may be sufficient land for the longer term, it is important to note that updated evidence for the next Local Plan to 2036 will include a review of land supply in a forthcoming SHLAA. For example, the overall supply includes three Broad Locations (totalling 800 dwellings) which will need to be reviewed and formally allocated (if they remain appropriate) in the next Local Plan.

- 3.3 Table 3.2 sets out the overall housing land position for the District according to the adopted Core Strategy target of 400 dwellings per annum, based on an earlier assessment of objectively assessed need. It shows an over-supply of land for 1,224 dwellings to meet a residual requirement of 5,773 dwellings to 2025, when account is taken of existing permissions, sites allocated in the adopted Land Allocations DPD and an allowance for sites in the Strategic Housing Land Availability Assessment (SHLAA) and windfall sites.

The Council's **housing supply** comprises the following elements:

Outstanding Planning Permissions

- 3.4 Sites with **outstanding planning permission** (both dwellings not started and those under construction) are set out in Appendix 3. The record of progress on development is based mainly on Building Control records, which monitor the start and completion of dwellings. In some cases there is a delay between the actual completion of a dwelling and the issuing of a completion notice by Building Control. In a few cases information on completions is based on site visits or other up-to-date information. No specific provision is made for demolitions, as there are no housing clearance areas in the district. The housing completions and planning permissions in the report are net figures to take account of (for example) the conversion or redevelopment of existing dwellings.

Remaining Allocations

- 3.5 Sites **allocated in the Land Allocations DPD** are listed in policy LA1.3 and other site specific policies. Those allocated sites which received planning permission by 31 March 2017 are listed in Table 3.3 below. Together these reduce the total estimated capacity of the remaining allocated sites by 829 dwellings, from 5,277 to **4,448** dwellings.

Windfall Sites and Small SHLAA Sites

- 3.6 A high proportion of residential permissions and completions in the district are windfall, as evidenced in Appendix 2 and summarised below:
- 80% of housing land available with planning permission at 31 March 2017 comprised windfall sites - see Appendix 3;
 - 77% (2,335 dwellings) of the 3,027 (net) dwellings completed between 1 April 2003 and 31 March 2017 were on windfall sites - see Appendix 2;
- 3.7 It is considered the level of windfall sites coming forward is likely to be maintained, for reasons including flexibility in the Core Strategy (policy CS1.2) regarding:
- a. the removal of development boundaries in a number of small villages;
 - b. new potential for some housing provision through 'infilling and rounding off' in a large number of small villages and hamlets. Trends will continue to be

- monitored annually and the windfall allowance adjusted accordingly, based on experience;
- c. Recent changes to permitted development rights which reduce the need for planning permission for conversions to residential use;
- d. Looking ahead, the draft Development Management Policies DPD policy DM13 proposes a (limited) relaxation of the current approach of 'infilling and rounding off' which is likely to increase land supply.

- 3.8 The windfall assumption comprises two elements – one for Small Villages, Hamlets and Open Countryside and one for Principal, Key and Local Service Centres.

Small Villages, Hamlets and Open Countryside: The Land Allocations DPD at 31 March 2013 included an allowance (491 dwellings) for windfall in small villages, hamlets and open countryside. Taking account of completions and permissions by 31 March 2017, this figure has reduced to an outstanding need for 258 dwellings to be provided from windfall sites over the remaining plan period.

Principal, Key and Local Service Centres: The windfall allowance in the 5-year supply to 2022 in service centres is based on evidence of windfall permissions in the preceding 5 years and (as advised in the NPPF) also takes account of SHLAA and the exclusion of garden sites.

Between 2012 and 2017, a total of 974 dwellings were permitted on windfall sites in service centres. Using this as a basis for future trends, we have applied to this figure:

- a reduction of 4% (to 935 units) to take account of garden sites, based on an analysis of extant permissions in the Housing Land Position Report 31 March 2012;
- a non-completion adjustment of 80% (to 748 units) in accordance with the approach to small sites with permission which have not started;
- a deduction of identified small sites in SHLAA (249 units within service centres) to avoid double counting, which results in a windfall allowance of **499** dwellings.

- 3.9 The following assumptions have been made in relation to the SHLAA and windfall figures:

- All small SHLAA sites have been taken into account;
- The windfall assumption for service centres relates to a 5-year period only and is considered therefore to be a conservative estimate.

Older People's Housing

- 3.10 Planning Practice Guidance (ID: 3-037-20150320, revised March 2015) notes that local planning authorities should count housing provided for older people, including residential institutions in Use Class C2, against their housing requirement. It notes that development proposals for accessible and manageable homes specifically for older people can free up under-occupied local housing for other population groups. Accordingly C2 uses including extra care housing are taken into account in terms of permissions and completions. Completions in residential and nursing homes are taken into account on a ratio of 5 bedrooms to 1 dwelling, on the basis that such schemes for older people will free up under-occupied local housing for other people.

4. The 5-Year Housing Land Supply

- 4.1 The NPPF states that that local planning authorities should, in summary:
- Identify and update annually a supply of specific, **deliverable sites** to deliver housing in the next 5-years;
 - Identify a supply of specific, **developable sites** or **broad locations** for growth for years 6–10 and, where possible, for years 11–15.

NPPF policy guidance in relation to the 5-year supply is set out in paragraph 2.1 above. The assessment below continues to take account of a ‘buffer’ of 20%, but this will be kept under review in response to future housing completion rates.

- 4.2 The following assessment of 5-year housing land supply is undertaken in relation to the latest evidence of objectively assessed housing need in the Council’s [Strategic Housing Market Assessment](#), or SHMA, (October 2017) of **290 dwellings per annum** for the period 2016 to 2036. This represents the Council’s up-to-date position statement on 5-year housing land supply. The 5-year supply position against the adopted Core Strategy housing target is also included below for purposes of comparison only.
- 4.3 [Table 4.1](#) provides the assessment of the 5-year housing land supply, based on the evidence set out in Appendix 1. It shows a supply of 4,395 dwellings on deliverable sites compared to the residual 5-year requirement of 1,754 dwellings, and represents a **12.53 year supply**.

- 4.4 For purposes of comparison only, Table 4.2 sets out an assessment of the 5-year land supply, in relation to the adopted Core Strategy of 400 dwellings per annum, based on an earlier assessment of housing need. It shows a supply of 4,395 dwellings on deliverable sites compared to the residual 5-year requirement of 4,330 dwellings, which would represent a 5.08 year supply.

Sources of Land Supply

- 4.5 The assessment of the 5-year supply in this Housing Position Statement is considered to be realistic and robust. The main elements which comprise the 5-year supply and key assumptions are set out below. This year's assessment is supported by information from developers and land owners in response to a survey for permitted and allocated sites of 10 or more units. This survey will be repeated annually.

Large Sites with Permission

- 4.6 An individual assessment has been undertaken of large sites with planning permission, which had 10 or more units, when first permitted. Together, at 31 March 2017, these make up 883 dwellings or 59% of all permitted dwellings (1,504 units) with planning permission. In most cases the assessment is based on the judgment of planning officers in conjunction with information available from owners, developers or agents. Appendix 1 (Table 2) sets out the evidence and judgments regarding the deliverability of the committed sites which form part of the 5-year housing land

supply, in relation to their suitability, availability and achievability. All **883 dwellings** on large permitted sites are considered deliverable within 5-years.

Small Sites with Permission

- 4.7 The remaining supply of sites with planning permission at 31 March 2017 comprises land for 621 dwellings on 422 small sites of less than 10 units. These make up 41% of dwellings with planning permission. The Council has insufficient resources to assess this number of small sites individually.
- 4.8 The NPPF states: “Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within five years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans”. However, a non-completion adjustment of 80% has been applied to ‘not-started’ dwellings on small sites. It is therefore estimated that **545 dwellings** are deliverable on small sites, which is considered a conservative estimate.

Allocated Sites

- 4.9 Land Allocations DPD: The housing site allocations considered deliverable within 5-years are listed in Section B of Table 2 of Appendix 1. These have an estimated capacity of **2,051 dwellings**. Further information on the suitability, availability and achievability of these sites is set out in the Land Allocations DPD and settlement Fact Files and other evidence base documents which accompanied the DPD at its submission and examination. The supply of developable sites and broad locations within the remainder of the plan period are as identified in the Land Allocations DPD.
- 4.10 The phasing of sites in the DPD is indicative only and reflects factors including site constraints and the overall phasing of development over the plan period as set out in the Core Strategy. A number of sites listed in phase 2 in the DPD (*in part to indicate a desirable spread of development over the plan period*) are considered in practice to be deliverable within 5-years. In accordance with the positive approach to planning set out in the NPPF, the Council would not seek to restrict sites identified in later phases from being permitted and developed earlier, provided that development constraints are addressed and policy and other requirements met. The list of proposed housing allocations considered deliverable within 5 years takes account of known constraints, including on-going discussions with United Utilities.

Small sites identified in the SHLAA

- 4.11 Small sites identified in the SHLAA study (March 2009) below the Land Allocations site size threshold of 0.3ha are included as part of the overall windfall allowance and comprise 360 units, as checked at 31 March 2017. To this figure, we have then:
- Applied again a non-completion adjustment of 80% (subtract 72 units);
 - Discounted the resulting **288 units** from the wider windfall allowance for service centres and small villages, hamlets and open countryside as set out below, to avoid any double counting.

Windfall Allowance

- 4.12 The NPPF states that an allowance can be made for **windfall sites** in the 5-year supply. It is considered that windfall sites will continue to make a significant contribution to meeting the overall requirement, based on the current and past trends, summarised in section 3 above. A windfall allowance therefore forms part of the 5-year housing land supply. It may be noted that:

- The average rate of housing development from windfall sites over the 5 years from 1 April 2012 to 31 March 2017 was 181 dwellings per year – a slight increase from an average of 179 over the 5 years to 2016.

4.13 The windfall assumption comprises two elements – one for Small Villages, Hamlets and Open Countryside and one for Principal, Key and Local Service Centres.

Small Villages, Hamlets and Open Countryside The Land Allocations DPD at 31 March 2013 included an allowance (491 dwellings) for windfall in small villages and hamlets and open countryside. Taking account of completions and permissions by 31 March 2017, this figure has reduced to an outstanding balance of 258 dwellings to be provided from windfall sites over the remaining 8 years of the plan. Over a 5-year period this amounts to 161 dwellings. When an 80% completion rate is applied, this amounts to **129** dwellings. This is equivalent to about 26 dwellings per annum. Dwelling completions in this tier of settlement rose from 18 in 2015/16 to 42 in 2016/17.

Principal, Key and Local Service Centres The windfall allowance in service centres in the 5-year supply to 2022 is based on evidence of windfall permissions in the preceding 5 years and (as advised in the NPPF) also taking account of SHLAA and the exclusion of garden sites.

Between 2012 and 2017, a total of 974 dwellings were permitted on windfall sites in service centres. Using this as a basis for future trends, we have applied to this figure:

- a reduction of 4% (to 935 units) to take account of garden sites, based on an analysis of extant permissions in the Housing Land Position Report 31 March 2012;
- a non-completion adjustment of 80% (to 748 units) in accordance with the approach to small sites with permission which have not started;
- a deduction of identified small sites in SHLAA (249 units within service centres) to avoid double counting, which results in a windfall allowance of **499** dwellings.

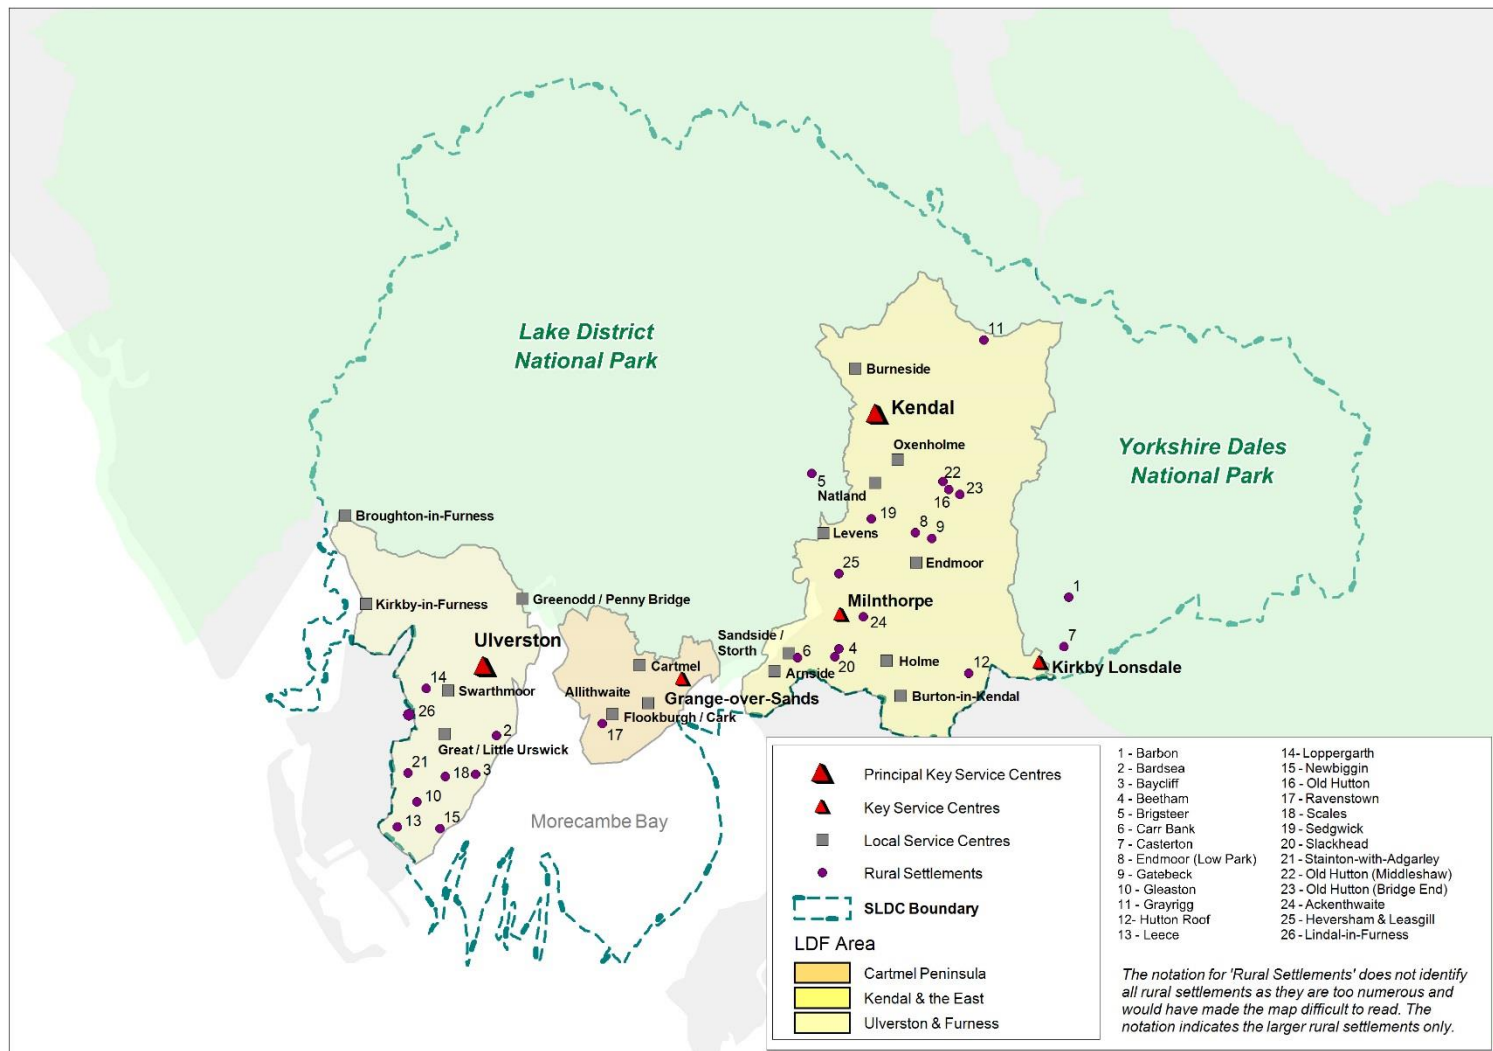

4.14 These assumptions will be kept under review and may be adjusted to take account of further information, analysis and feedback.

5. Conclusions

5.1 The 2017 Housing Land Position Report provides an assessment of the 5-year housing land supply position in relation to the latest evidence of objectively assessed housing need in the Council's Strategic Housing Market Assessment (SHMA, October 2017). This represents the Council's up-to-date position statement on 5-year housing land supply. The 5-year supply position against the adopted Core Strategy housing target is also included for purposes of comparison only.

5.2 On this basis, the report at Table 4.1 demonstrates that there is a **12.53 year supply** of deliverable sites to meet the 5-year supply requirement. This continues to include the addition of a 20% buffer but this will be reviewed in future years.

TOTAL		883			

2) Small Sites of less than 10 dwellings outstanding at 31 March 2017

422 sites, 621 units	Yes	Yes	Yes
There are 621 dwellings outstanding on sites of less than 10 units, together comprising about 41% of all dwellings with planning permission. In view of the number of sites, the Council does not have resources to assess these in detail. A non-completion rate within 5-years of 20% is applied to sites which have not started, reducing the total to 545 dwellings.			

B – Land Allocations DPD					
5-year Supply Sites					
Allithwaite: Land South of Green Lane	22	22	Yes	Yes	Yes
			Agent confirmed in January 2017 that a planning application was to be submitted in Spring 2017 and discussions are ongoing with a developer, who has held a public consultation (Russell Armer Ltd).		
Allithwaite: Land rear of Bankfield	9	0	No	Yes	No
			Willing landowner at plan adoption but have since received confirmation that the land will not be released in the current owner's lifetime (her son will then release it).		
Allithwaite: Land rear of Barn Hey	30	30	Yes	Yes	Yes
			Willing landowner at adoption of Plan. Discussions with land owner and his agents within last 2 years. Council informed late 2015 that an application (or at least a pre-app) could be expected imminently although this has yet to be forthcoming.		
Allithwaite: Land to Rear of Almond Bank	11	11	Yes	Yes	Yes
			Willing landowner at plan adoption. No evidence received to indicate a change to that intention.		
Brigsteer: Land opposite The Wheatsheaf	7	7	Yes	Yes	Yes
			Community Land Trust is promoting for 7 dwellings – 4 affordable, subsidised by 3 market homes. Site is now within the Lake District National Park.		
Broughton in Furness: Foxfield Road	16	16	Yes	Yes	Yes
			Willing landowner at plan adoption. Since then the site has changed hands which may indicate it will come forward for development soon.		
Burneside: Land adjacent to Hall Park	70	0	Yes	Yes	Yes
			Conservative assessment of potential supply, taking account of the sewerage issue - although United Utilities indicate that development can be accommodated in Phase 2 (2017-22).		
Burneside: Village recreation (Willink) Field and tennis courts	23	0	Yes	Yes	Yes
			Conservative assessment of potential supply, taking account of the sewerage issue - although United Utilities indicate that development can be accommodated in Phase 2 (2017-22).		
Burton: Mixed use allocation at Green Dragon Farm	86	50	Yes	Yes	Yes
			Willing land owner. <i>Development Brief adopted August 2017.</i>		
Burton: East of Boon Town	23	23	Yes	Yes	Yes
			Willing land owner and site is being actively marketed for sale as a development opportunity.		

Cartmel: Land at Haggs Lane	39	39	Yes	Yes	Yes
			Owner confirmed in January 2017 that site is being progressed in 2017/2018. Holbeck Homes. <i>An application for development, SL/2017/0732 subsequently received in August 2017.</i>		
Cartmel: Stables, Cartmel Racecourse	15	0	Yes	Yes	Yes
			Site can only be developed once a new site has been found and developed to which to relocate the stables. This is required so that horses are not required to cross a road to get to the racecourse. Not aware of any progress.		
Endmoor: North of Sycamore Close	100	60	Yes	Yes	Yes
			<i>Development Brief adopted August 2017 and planning application received in September 2017 for 106 dwellings.</i>

			Part developed. SLDC considering options for remainder of site		
Grange: Mixed use allocation at Guide's Lot	16	0	Yes	Yes	Yes
			In Cumbria County Council (CCC) ownership. Site visit with owners in February 2017 confirmed that CCC is likely to market the site with a view to development in the near future. However it is recognised that this is a complex site.		

Grange: Opposite Low Fell Gate Farm	46	0	Yes (in longer term)	Yes	Yes
			Aware at adoption that part of the site would only be available once the current tenant farmer's lease had run its course. This part is required for the access to the other part of the site.		
Grange: West of Cardrona Road	28	0	Yes?	Yes	Yes
			Willing landowner at plan adoption. No firm evidence received to indicate a change to that intention but there is some indication that the landowner may no longer be willing to release the site.		
Great / Little Urswick: Mid Town Farm	27	27	Yes	Yes	Yes
			Willing landowner at plan adoption. No evidence received to indicate a change to that intention.		
Greenodd / Penny Bridge: Land at the Old Vicarage	21	21	Yes	Yes	Yes
			Willing landowner at plan adoption. No evidence received to indicate a change to that intention.

C – Strategic Housing Land Availability Assessment					
Small Sites (as at 31/3/17)		Yes		Yes	Yes
There are 360 units identified by the SHLAA study at 31 March 17 that are on sites below the threshold for consideration in the Land Allocations DPD. The SHLAA was unable to assess in detail the availability and achievability of all sites but was able to make a judgement on the basis of known information. A partial review of these sites has removed any with a current planning permission for residential development. It should be noted that the remaining sites have no planning status and it is likely that not all sites would be developed. A non-completion rate of 80% was applied to take account of additional factors that may arise at planning application stage and estimated build out rates, reducing the total to 288 units.					
D – Windfall (additional to SHLAA)					
Windfall (as at 31/3/17)		Yes		Yes	Yes
		The assessment of an estimated contribution to housing supply from windfall sites is set out in paragraph 4.5 of this report.
