As part of the water mains rehabilitation works on behalf of United Utilities, we require to renew 2.5km of water mains (4" PV). On this location, we will require to Open Cut (open excavations) about 30m after the existing bridge towards Cumbria Way on carriageway in order to install the new water main and fittings. We will abandon the existing water main (existing patches shown on the carriageway, about position of existing water main). We will use mechanical digging as preference, however on this location, we can use hand digging and VacEx to not damage any tree roots. Reinstatement as per found once works are completed. No expectation to trim/ felling/ remove any tree. Taking as reference three trees stems, we have a min RPA radius of 22.8m, 12m and 15m, therefore we will be working within the RPA radius.
